

Client Focused Technology®

Finally, the technology solution you've been asking for.

Simple to Use • Quick to Implement • Easy to Learn

Pro Staff Talent Management Services is the product of combining dedicated people, processes and technologies to achieve your goals. While technology plays a vital role in the workforce management process, we believe that technology should support the right people and processes, not the other way around. That's why we offer our Client Focused Technology® as a tool to enhance your total staffing solution.

Why Client Focused Technology?

We developed Client Focused Technology (CFT) after listening to our customers and understanding the need to provide easy access to valuable information for forecasting, management and measurement purposes. CFT is an alternative to vendor management or spend-tracking software as it eliminates the costly and time consuming integration, training and implementation process by providing secure access through an internet link.

PRO STAFF | Talent Management Services

Welcome, Jane Doe representing ACME Inc.

Client Focused Technology

ESR001Manager

"CFT was implemented in just 6 days and training took us only 15 minutes."
- Manufacturing Manager, MCFA

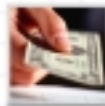

The Value of Client Focused Technology

While many technologies can require a sizable investment of time and money to implement, CFT is a quick, easy and cost-effective solution. In fact, CFT is fully implemented in less than 30 days. CFT also offers the added convenience of 24/7 access to your workforce management data.
